MANINDER SINGH

RICHMOND HILL, NY – (718) 415-5542 – SINGHMANINDER1245@GMAIL.COM - WWW.LINKEDIN.COM/IN/MANINDERSINGH11

Enterprise IT professional focused on endpoint management, network security, and cloud administration. Skilled in Microsoft 365 and Azure administration, MDM platforms, vulnerability remediation, and distributed infrastructure support. Dedicated to delivering secure, reliable, and efficient IT solutions while advancing expertise in security and systems engineering.

Education

Adelphi University: Bachelor of Science, Computer Science - Information Security — September 2019 - May 2023
Western Governors University: Master of Science, Information Technology and Management — June 2025 – Present

Projects

- Architected and deployed a production internal asset management portal for the IT department at Uncle Giuseppe's Marketplace, consolidating inventory records for 2,500+ endpoints across 14 locations and enabling centralized tracking of device metadata, ownership, location, assignment status, and asset lifecycle workflows.
- Home lab: Built a virtualized enterprise home lab with Proxmox and pfSense to simulate domain, firewall, networking, and endpoint administration.

Work Experience

Uncle Giuseppe's Marketplace - IT Field Technician – Systems & Network Support — March 2025 - Present

- Serve as lead frontline IT resource, resolving 75-100+ weekly tickets with a 99% resolution rate while maintaining high service quality and response times.
- Administer and optimize Microsoft 365, Active Directory, and Azure environments, managing 1,200+ user accounts, licensing, access controls, group policy enforcement, and user/device provisioning and decommissioning.
- Develop Python and PowerShell automation for identity and endpoint reporting, including inactive users, MFA-disabled accounts, disabled users with active licenses, and weekly Intune device check-in reports.
- Leverage ConnectSecure to proactively identify, analyze, and remediate network and endpoint vulnerabilities, strengthening organizational security posture and minimizing exposure to threats.
- Led the implementation and standardization of mobile device management across iOS and Android platforms using Intune and Scalefusion, enhancing device security, enforcing compliance policies, and improving efficiency in large-scale device provisioning and management.
- Created and maintained device management policies across multiple MDM platforms and Group Policy environments, standardizing security baselines, compliance controls, application deployment, and endpoint configuration across enterprise devices.
- Played a key role in a company-wide Windows 10 → 11 migration across 1,000+ devices, established and deployed a centralized domain environment (transitioning from local-only systems), and led the upgrade of store servers from Linux to Windows, improving standardization, security, and manageability.
- Manage network security and redundancy across 14 locations, ensuring high availability, secure traffic flow, and continuous business operations.
- Drive improvements in asset management practices across 2,500+ devices, enhancing tracking accuracy and operational efficiency.
- Collaborate cross-functionally with vendors and internal teams to support cloud integrations, VoIP systems, and infrastructure initiatives, improving service delivery speed and reliability.

Custom Computer Specialist - IT Field Technician — November 2024 - March 2025

- Supported EPIC Technical Dress Rehearsal at Northwell Health inpatient and ambulatory sites, validating device readiness for application go-live.
- Installed new workstations using SOP imaging and deployment processes when needed.
- Deployed and configured peripherals including printers, scanners, badge readers, signature pads, barcode scanners, and webcams by setting up hardware, installing drivers, and ensuring reliable functionality throughout the asset lifecycle.
- Integrated new workstations with on-premises and cloud-hosted applications by configuring systems, user profiles, and required software.
- Evaluated and troubleshooted workstation hardware, software, network appliances, and connections to cloud systems.
- Provided documentation, including client sign-off, inventory information, and post-support resolution.

Adelphi University - Endpoint Technician — February 2022 – May 2023

- Delivered frontline IT support to students and staff, closing 25+ daily ServiceNow tickets with a 95% satisfaction rating.
- Installed workstations, peripherals, and integrated them into campus networks and cloud services.
- Provided support through ServiceNow, resolving user issues related to accounts, hardware, software, networking, and classroom technology.
- Maintained and updated equipment inventory in ServiceNow, identifying 500+ End of Life (EOL) devices, coordinating all decommissioning, and ensuring compliance with replacement protocols.

Community Federal Savings Bank - IT Support Intern — September 2021 – January 2022

- Performed daily system monitoring, verifying the integrity and availability of hardware, server resources, and key processes.
- Provided end-user support for desktops, LAN/WAN, and cloud-based applications.
- Collaborated with senior staff to resolve software and hardware issues, improving performance and user experience.
- Reviewed system requirements and configuration, reporting bugs, and anomalies to tier two support.
- Supported desktop and virtualized environments, contributing to early-stage cloud integration efforts.

Technical Skills & Certifications

Automation & Scripting: Python, PowerShell, Power Automate, SQL, Git/GitHub, WinSCP, PuTTY
Cloud & Endpoint: Microsoft 365, Entra ID / Azure AD, Intune, Endpoint Manager, Autopilot, Conditional Access, MFA/SSO, Exchange Admin Center, SharePoint Admin Center, OneDrive Administration, Microsoft Defender for Endpoint, Scalefusion MDM, SOTI MobiControl/MDM
Systems & Networking: Active Directory, Group Policy (GPO), IAM, TCP/IP, DNS, DHCP, VLANs, Windows/macOS/Linux, Windows Server, patching, hardware deployment
Security & Monitoring: Endpoint Security, Vulnerability Remediation, Patch Management, High Availability & Redundancy, Wireshark, Splunk (foundational), Grafana (foundational), ConnectSecure
Tools: ServiceNow, Smartsheet, LogMeIn, N-Able/N-Central, Citrix, AutoCAD (basic), Adobe Suite, Zoom Workplace
Certifications: AWS Certified Cloud Practitioner CLF-C02; MS-102: Microsoft 365 Administrator; CompTIA A+; Google Cybersecurity; PMI CAPM
Core Strengths: Analytical Problem-Solving, Advanced Troubleshooting, Project Ownership, Technical Communication, Stakeholder Support, Operational Adaptability, Attention to Detail, Cross-Functional Collaboration, Process Improvement, Independent Decision-Making
